Liana Isaias-White	z5257234	Scrum Master + Frontend Developer	z5257234@ad.unsw.edu.au
Brendan Ye	z5254583	Backend Developer	z5254583@ad.unsw.edu.au
Ian Hou	z5324093	Backend Developer	z5324093@ad.unsw.edu.au
Jinghan Wang	z5286124	Backend Developer	z5286124@ad.unsw.edu.au
Raymond Li	z5258024	Frontend Developer	z5258024@ad.unsw.edu.au

Technical Quality & Engineering Practices

Technical quality:

- Developed a diagram representing our system architecture for our app
 - Proper planning allowed us to adhere to our system architecture

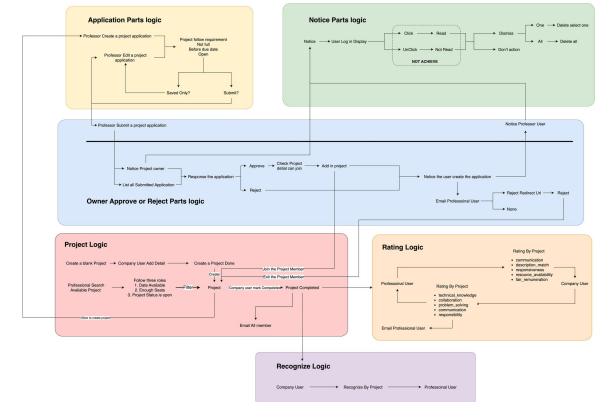

Engineering Practice:

- Pair programming
- Reviewing merge/pull requests
- Implementing listed items in retrospectives

Extendables/Maintainable:

- React is naturally extendable
- Good function naming and good variable naming makes it clear to use
- Modular programming → database, frontend separated into screens and components
- Decoupled database
- Version control, good git practices
- Iterations and agile methodology

Difficulties

- Token
- Set up
- System architecture and programming languages
- Emails
- Managing differences between professional and company →
Good state management

Fault Tolerance

- Error checking on the backend and modal on the frontend

Project Objectives + DEMO

1. **Authentication**
 - a. Login/Register
 - b. Logout
2. **Profile**
 - a. Edit Project Details
3. **Projects**
 - a. Dashboard
 - b. Filtering + Search Functionality
 - c. View Project Page + Project Creation
 - d. Editing and Close Projects
 - e. Project Members Management
 - f. Application Request/Email Notification
 - g. Project Update
4. **Rating and Achievements**
 - a. Project Member Ratings
 - b. Project Certificate and Achievement
5. **Admin**
