# COMP3900/9900
# 2023 T3
# Participation and Peer Assessment

❖ **Peer Assessment** (due **Week 10 Saturday 18 November 2023 @ 9.00pm**) (worth **20%**):

This is a **compulsory** peer assessment **individual** submission.

**Each team member must** submit a **text file** (namely **<your zID>.txt**).

Each line of this file contains the zID of your team member, followed by a space, followed by an **integer score** from **0** to **10** (full mark).

**Do not** include yourself in the file.

The score is to indicate the **relative efforts** and **contributions to the project**, from **your perspective**.

For example, a sample file looks like:

```
z1000123    8
z1234567    8
z1234123    10
z2468123    4
```

if you believe that the first two members contributed well to the project, and the third member is the critical contributor, whilst the last person has done unacceptable work for the project. Remember, you are not one of them on the list.

Note that the scores received for a team will be aggregated and consolidated. Furthermore, the **deviation** of the scores **matter** (whilst the **actual scores do not**). For example, every member having the same score of **7** is the same as every member having the same score of **3**. Similarly, it will have the same effect to the score of every member of the group if the above sample file is changed to:

```
z1000123    4
z1234567    4
z1234123    5
z2468123    2
```

If **extreme scores** are obtained within a team, **records** on **GitHub** (including individual **Work Diaries**), **Jira**, and individual **lab progress** from tutor/mentor will be **used to substantiate these scores**. Therefore, keep your **GitHub** repository and **Jira site** account for **at least a month** after you receive the course grade for COMP3900/9900.
