COMP3900/9900
2023 T3
Final Demo/Presentation
Assessment

❖ **Project Demonstration/Presentation** (during **Week 10 Lab Time**) (worth **20%**)

Each group should prepare a **15-18 minute** presentation about the **final outcome** of the project. This should be a demonstration of the system built, which includes a presentation of other project aspects described in the demonstration/presentation marking criteria below.

Each member should **contribute** to one part of the demonstration/presentation. That is, each member must **speak** during the final demonstration/presentation.

Any member who is **absent** or **not speaking** during the demonstration/presentation receives **0 mark out of 20** for the demonstration/presentation assessment item.

Please note that **clients**, **UNSW community**, but also **outside experts** (e.g., from **prospective employers**) may be invited to project final demonstrations/presentations.

We adopt guidelines similar to the **CSE Honours** thesis system which have been adjusted to better fit COMP3900/9900 course which is project focused.

❖ Demonstration/Presentation Marking Rubric

Category	Max Mark	Team Mark	Comments
Technical Quality and Completeness of the Project as Demonstrated (70%)	**14**		
Complete, fully functional, correct, and coherent demonstration/presentation by all team members, covering all project objectives/requirements	6		
User interfaces are well designed and working without issues	4		
High technical quality, demonstrating excellent engineering practice, and solid methodology	4		
Structure and Delivery of the Demo/Presentation (30%)	**6**		
Demonstration is well prepared, and confidently and professionally delivered	2		
Demonstration is well structured with evidence of good teamwork	2		
Q and A handled well	1.5		
Adherence to demo/presentation time requirements	0.5		
Total Mark (out of 20)	**20**
